FOREWORD

The information contained in this summary was derived from data submitted by the technical colleges on their 2000-01 projected cost allocation schedules.

Cost allocation information is used to calculate the distribution of state aids to each college, and prepare financial and enrollment reports including state statistical summaries and reports on the financing of technical education in Wisconsin. The data is also used to answer requests for information from the Governor, the Legislature and the public.

The Research and General Administration functions have been eliminated in the Wisconsin Technical College System and the associated costs distributed to other appropriate functions. The schedules in this report reflect this accounting change.

Beginning with fiscal year 1997-98 Actual and fiscal year 1998-99 Projected, the Non-Postsecondary Aid Category has been added to the Cost Allocation Summary Report. This aid category is used for costs and FTE's related to instruction below the post-secondary level or where instructional level is not applicable. Included in the Non-Postsecondary Aid Category is Basic Education, the Hearing Impaired Program (HIP) and the Visually Impaired Program (VIP).

The table below provides a statewide summary by aid category of the 2000-01 projected unit costs and ratios for full-time equivalent (FTE) students:

	College Parallel	Associate <u>Degree</u>	Technical <u>Diploma</u>	Vocational- Adult	Non-Post- secondary	Community Services	<u>Total</u>
Total Operational Cost ¹	\$41,787.2	\$364,665.5	\$146,044.4	\$49,986.8	\$79,326.5	\$2,634.3	\$684,444.7
Full-Time Equivalent Students ²	4,925	33,156	9,234	4,418	6,701	347	58.781
Cost per Full-Time Equivalent	\$8,484	\$10,999	\$15,817	\$11,314	\$11,838	\$7,595	\$11,644
Cost per FTE Ratios	.73	.94	1.36	.97	1.02	.65	1.00

The financial and enrollment information reported in this summary will not be finalized until after completion of the required audits in the following fiscal year. Enrollments may not agree on all schedules due to rounding of some college projections which were submitted to the hundredth of an FTE. Differences in unit costs appearing in the schedules which follow reflect the interplay of factors unique to each college, including the mix of programs, the number of locations where courses are offered, enrollment levels, and the average number of credits for which students enroll.

¹In thousands.

²An FTE student represents 30 credits in each aid category.

¹The numbers vary because of differing organizational structures among the districts. This position classification includes the district director and other certified administrators/ supervisors who are responsible for the overall educational program of the district or for an assigned portion of the overall educational program.

²This is the sum or average of the four previous staff classifications.

³The (#) columns indicate number of staff: The top portion contains full-time equivalent (FTE) staff numbers; the bottom portion contains each district's percentage distribution of staff which adds horizontally, except for the total column which adds vertically.

The (\$) columns indicate average compensation. The top portion contains amounts that are the mean personal services cost of salary plus fringe benefits for each staff classification, the total represents the statewide mean personal services cost for that classification, the bottom portion contains each district's rank for that classification.

¹Figures rounded as follows: full-time equivalent (FTE) students to nearest tenth, and average (arithmetic mean) materials fees per credit to nearest nickel.

²Computed as follows: each district's materials fees by aid category were divided by the FTE students, and that cost per FTE quotient was divided by 30 to yield the materials fees per credit. This amount will vary according to each district's program mix and number of exemptions by aid category.
